Sales Professional:

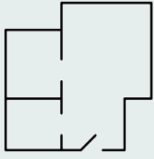

Living Center Kitchen
Opt. Built in Study Area
Parade of Homes Floor Plan

The Harrison transforms a traditional kitchen into a LivingCenter in which the areas for food preparation and storage are seamlessly integrated into casual dining and a large living area perfect for daily life as well as the dinner party. Furniture grade cabinets are not only pleasing to the eye, but also offer function for the family chef. For more formal occasions, the Dining Room is just off the kitchen. A laundry room, powder room, and mud room complete with storage finish the first floor.

At the top of the stairs you'll find a nice desk area which is nicely accessible from all four bedrooms. A second bath services the off-bedrooms with dual vanity and extra linen storage. The Master Bedroom is roomy enough for a sitting area and its walk-in-closet is generously sized. In place of a rarely used tub, you'll find a nicely sized shower and water closet in the master bath with two sinks and plenty of linen storage.
